

**Benchmark Holdings plc**  
**Annual General Meeting (“AGM”)**  
**9 February 2021 - 12.00pm**

**Question from Shareholder**

What is status with the EU re final approval on BMK08. Has this now been cleared and is it now ready for commercialisation?

**Answer from Benchmark**

The process to ratify the MRL (Maximum Residue Limit) under European Law is underway and proceeding as expected. In the meantime, the Company continues to prepare for the launch of BMK08 and CleanTreat® in Q2 calendar year 2021, progressing through the regulatory approval process to obtain a Marketing Authorisation in Norway, and building the operational infrastructure to be launch ready.
